

COVER LETTER

I would like to introduce myself to you and submit my resume for a Graphic Design position. My well-rounded background is a strong match for your organization, and as such would like to arrange for an interview.

I am an educated and qualified designer, with over 10 years experience in this industry, having worked from Vancouver, B.C. to Sydney, Australia and in between. My current education and background in the industry, combined with my experience in the Adobe Master Suites, will allow me to be a successful member of any design team. I am professional, enthusiastic, highly motivated, organized and adept at meeting tight deadlines that are so common in this industry.

I have worked extensively with small and large businesses across commercial, health and fashion sectors, developing branding packages and advertising / marketing strategies; with a strong graphic background in brand communication, print, illustration, web design and audio / video editing. As well as having worked as Lead Designer, for two International Fashion Apparel companies, developing all types of media including; press releases, marketing campaigns, E-strategies, packaging design, apparel design, merchandising and trade show booth design.

Managing creative projects from concept to completion, I thrive for fast paced work environments, am compulsively organized and have strong communication skills. With a keen eye for slick and cutting edge designs, I continually stay in-tune with the latest trends in the market place.

I look forward to discussing this further with you and reviewing the needs of your company in greater detail.

Should you wish to view my detailed work history and a sample of my online portfolio please visit;
